Career In Fashion Designing & Technology

Fashion Designing

Fashion designing is one of the most exciting career options in today's world. It is needless to say that in a country like India, where textile and garment industries have been thriving for ages, the recent boom in fashion designing has led to innovation and new prospects in the existing domain of garment and accessory design. If you have a penchant for creativity, style and originality, a career in fashion designing can be perfect for you. On one hand, the fashion industry satisfies both the creative fancies and the materialistic needs of the people, on the other hand it promises glamour, fame, success and high pay packages to the talented people. However, it is also a demanding career, as fashion designers need to combine their creativity with managerial skills to sustain in this industry. Thus, if you can create magic with colors, designs and shapes, just acquire apt professional skills to begin a successful career in Fashion Designing.

Actuarial Science

What do Actuaries do ?

a) Actuaries Make Financial Sense of the Future. Actuaries are experts in assessing the financial impact of tomorrow's uncertain events. They enable financial decisions to be made with more confidence by:

* Analyzing the past * Modelling the future * Assessing the risks involved
* Communicating what the results mean in financial terms.

b) Actuaries Enable More Informed Decisions :

Actuaries add value by enabling businesses and individuals to make better- informed decisions, with a clearer view of the likely range of financial outcomes from different future events.

The actuary's skills in analysis and modelling of problems in finance, risk management and product design are used extensively in the areas of insurance, pensions, investment and more recently in wider fields such as project management, banking and health care. Within these industries, actuaries perform a wide variety of roles such as design and pricing of product, financial management and corporate planning. Actuaries are invariably involved in the overall management of insurance companies and pension, gratuity and other employee

benefit funds schemes; they have statutory roles in insurance and employee benefit valuations to some extent in social insurance schemes sponsored by government.

Who Can Become An Actuary ?

Any person with minimum 18 years of age and having a high degree of aptitude for mathematics and statistics can take up this course and become an Actuary. Generally, first class graduates or postgraduates in Mathematics, Statistics or Econometrics will be in a better position than others to qualify as actuaries.

To qualify as an Actuary, a candidate has to pass all examinations in the prescribed subjects. In addition, he has to comply with other criteria such as experience requirement and attendance at a professionalism course prescribed for the purpose.

Duration of the Course

There is no fixed duration to complete the course. Since all the 16 subjects prescribed are to be cleared before one is awarded the Fellowship, continued and sustained effort is necessary to complete the course. Single minded devotion, total dedication and a systematic approach to problems are the qualities that will enable a person to qualify as an actuary within a reasonable time.

Criteria for becoming Student Member

A person is eligible to be considered for admission as student member if he/she satisfies the following conditions:

1) Should have completed 18 years of age

2) Should have attained **any one** of the following Educational Standards

A) Passed 10+2 (H.S.C) or equivalent with at least 85% in Mathematics/Statistics.

B) Graduate or Post Graduate with Mathematical subjects. For this purpose following subjects

Retail Management

Today, retail in India is huge, close to $200 billion, of which organised retail accounts for just $6 to $7 billion. This $200 billion is bound to become $300 billion in the next five to six years. Organised retail in India is expected to grow at 40% for the next five years, thanks to the nascent stage of modern retail and the 'malling' of India. Retail has captured the imagination of the entire nation. Approximately 80 million square feet of mall space is expected to be available by the end of 2008.

is the half
victory.

Animation and Cartoon Making

Creativity, even in the very recent past, could not earn a person a monthly salary but now the scenario is completely different. In the booming market of cartoons and animations, one can easily satiate his creative spirits and take home a handsome pay packet.

The art of animation, a creative field dominated by the West, now has India running as one of the most serious contenders. Cartoons are illustrations of a single diagram with varied meanings, while an animation is a rapid display of 2-D or 3-D images to create an illusion of motion.

Animation and Cartoon Courses Institutes in India

There are various courses on animation and cartoons offered in colleges all over the country. The major colleges are :

1. National Institute of Design (NID, Ahmedabad). *www.nid.edu*
